### **DETAILED ACTION**

Claims 1-14 are pending. This application is a national stage entry of PCT/AU04/01592, filled on 11/22/2004. This application claims foreign priority to AU 2003906417, filed on 11/21/2003 in Australia.

### ***Election/Restrictions***

1. Applicants' election without traverse of group II, claims 5-8, filed on 06/23/2009 is acknowledged.
2. Claims 1-4 and 9-14 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected group or species, there being no allowable generic or linking claim.
3. Claims 5-8 will presently be examined to the extent they read on the elected subject matter of record.

### ***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. ***Claims 5-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Bonner (US 5,498,439).***

6. Bonner meets all of the limitations of the claims 5-8. Bonner teaches an encapsulation material comprising casein as protein and modified starch as treated carbohydrates (paragraph claims 1, 3, and column 3, line 50 and 51).

***Double Patenting***

7. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the “right to exclude” granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

8. A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

9. Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Art Unit: 4131

10. ***Claims 5-8 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1, 2, 5, and 6 of copending US application 10/573,784 (US 2007/0122397 A1).***

11. This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

12. The instant claims 5-8 recite an encapsulation material comprising resistant starch as treated carbohydrates and casein or whey as protein.

13. The 10/573,784 application claims 1, 2, 5, and 6 recite microorganisms encapsulated with a film forming suspension comprising a resistant starch and casein or whey as protein.

14. It is obvious that the encapsulation material claimed in the instant claims 5-8 is as same as the film forming suspension.
